(54) AUDIO MESSAGE SERVICE METHOD IN PAGING SYSTEM

(57) Abstract:

PURPOSE: A method which serves the left audio message at a desired time after an audio message is left through an audio post office box when a paging operation is generated in a paging system is provided.

CONSTITUTION: In an audio message service method in a paging system, when a wireless subscriber paging number is received, it is detected whether an audio record confirm mode selecting key, a caller confirm mode selecting key, or a receiver confirm mode selecting key is inputted. When the audio record confirm mode selecting key is inputted, audio messages stored in the audio post office box are sequentially transmitted. When the receiver confirm mode selecting key is inputted, a desired time is inputted and an audio message recorded in the audio post office box is transmitted.
